

## Press Release

### Kern exhibits again at LogiMAT 2025

#### Müller also on site as a new member of the Kern Group

**Bensheim/Kranzberg.** Kern will once again be represented with an information booth at LogiMAT 2025 in Stuttgart. The international trade fair for intralogistics solutions and process management will open its doors from 11 to 13 March 2025. The largest annual intralogistics trade fair is the ideal setting for the Group to present its award-winning PackOnTime *2box* multi-format packaging system. A wide range of original samples will be on display, and extensive information material and a model will also be available.

The system perfects the automated packaging of goods in a wide range of sizes. The packaging is customised to the respective contents. This reduces material consumption to a minimum and thus fulfils the highest requirements for sustainability and cost-effectiveness. Upholstery materials are also saved, thus noticeably reducing the transport volume. If required, the PackOnTime *2box* can process any combination of different unit loads within a pack in just a few steps and constructs a robust pack that can be used for returns. As the system only produces packaging when it is needed, additional storage space is saved.

In terms of efficiency, the system is therefore an absolute pioneer, which has already led to several prizes and awards.

'We are looking forward to presenting this smart solution in the attractive environment of LogiMAT in Stuttgart and hope to have interesting discussions at our stand in Hall 6 and a successful trade fair,' says Michael Horch, Head of Business Unit kern*Pack*.

Kern at the LogiMAT: Hall 6, Booth No. 6D29

The newest member of the Kern Group, Müller Apparatebau GmbH, will also be represented at LogiMAT 2025 as a leading provider of flexible paper management solutions. Müller will be presenting LogiPack, a high-precision document insertion system that has been specially developed to meet the requirements of modern intralogistics. The LogiPack enables the automatic and precise insertion of invoices or personalised documents into shipping cartons. Thanks to its flexible configurability, it can be seamlessly integrated into existing conveyor systems and expanded as required. With an impressive throughput rate of up to 2,200 cartons per hour, the LogiPack guarantees a high level of processing reliability and availability.

'LogiMAT 2025 is our first logistics trade fair at which we will be exhibiting our LogiPack. We look forward to presenting our LogiPack and the new LogiFeed, which has been specially developed for the logistics market, to trade fair visitors in action at our stand EO35, East Entrance, and to holding interesting discussions,' says Josef Flörs, Director Sales & Services at Müller Apparatebau GmbH.

Müller at LogiMAT: East Entrance Hall, booth EO35

On an exhibition area of more than 125,000 square metres, LogiMAT offers a complete market overview of everything that moves the intralogistics industry. International exhibitors showcase innovative technologies, products, systems and solutions for streamlining, optimising and reducing the costs of internal logistics processes. The trade fair's motto for 2025 is 'Hands-on Innovation - Connecting Smart Networks'.

#### About Kern:

We have a long tradition of innovation. Kern offers products, solutions and services for high-volume letter and parcel deliveries: Inserting and packaging systems as well as a professional 24/7 service.

At Kern, everything comes from a single source: from development to production, installation and commissioning on site. All segments are seamlessly linked to the traditional inserting business (*kernMail*). The mailing logistics division (*kernPack*) is also successfully staffed. The worldwide *kernService* guarantees optimum availability and productivity of the systems.

#### About Müller Apparatebau GmbH:

Müller stands for highly flexible processing of digital print products: automated stapling, folding, cutting, inserting and the dispensing of plastic cards in various levels of complexity. Müller paper management solutions can be individually configured from more than 100 combinable modules. We develop and produce almost all components ourselves, from

mechanics and electronics to software. Our customers worldwide appreciate the flexibility of our systems.
